PROJECTS

TITLE: Monitoring and controlling water consumption using IoT
This project seeks to cut down on the water wasted in households by introducing a smart water faucet control device water management system. It encourages the use of water in an economical manner by enabling usage control over distance and thus helps to save water.

AWARDS

OUT STANDING STUDENT AWARD: I received the Outstanding Student Award in college for excelling academically and actively volunteering in numerous events, showcasing my dedication and leadership.

BEST PAPER PRESENTER AWARD: My team received the Best Paper Presenter Award in college for delivering a well-researched and impactful presentation.

VOLUNTEERING

IEEE VOLUNTEER: As an IEEE volunteer, I gained valuable experience by conducting various technical and non-technical events in college, which significantly enhanced my communication skills.
